

# Learning Management System (LMS)

Making it easy for everyone  
to learn anytime and anywhere

# What is LMS?

A platform to host all training content for the use of employees

## Hosting

A cloud based CMS application to host training content for the use of employees

## Assessment & certification

An online assessment and certification platform where employees can download the certificate on successful completion of the course.

## MIS

A dashboard for HR to monitor the progress of learning by individual employees

# Advantage with own LMS

Don't pay for the features that you don't use

-  **Accessibility**
-  **Convenience**
-  **Cost-effective**

---

Accessible on any device  
(desktop, tab, mobile)

---

Helps employees learn at their  
own pace and convenience

---

A one time investment that is  
cost effective with low  
maintenance cost

# Learning Organizations

According to a Gallop survey in 2019, over 70% of employees feel more engaged with their workplace when provided with learning opportunities

# It's time to level up

## 01 Induction Programs

Make the onboarding experience easy and memorable

## 02 Product and process

Help employees with well-structured training interventions and shorten the learning curve

## 03 Skill building

Provide employees with opportunities to learn and perform

# HR Dashboard

A dashboard to monitor and review the progress of learning

01

## On Screen

Employees get to go through the training content on the screen.

02

## Downloadable

Allow employees to download certain content for their future use/reference.

03

## Video Lessons

Video lessons structured in a logical sequence.

04

## Online Certification

Company branded certificates made available for download online.
